

My WatchList is a custom regulatory change management tool that allows you to monitor change at various detail levels. At the Federal level, it can monitor an entire CFR, a part, or just a specific section. Monitoring at the State level can be done for the entire state or just a specific section.

MyWatchList helps you monitor for change, but it also helps you manage the monitoring process. Its view history log allows you to show compliance with ISO 14001:4.3.2 requirements and those of RC14001. The view history log can also be used to show compliance with your internal auditing controls.

Point and click setup of regulations to be monitored makes using My Watch List: fast, unobtrusive, and accurate. Once the regulation is entered for monitoring, just click on the title to go directly to the full text of that regulation. Now you can instantly see the date of the last change. Highlighted in red are changes since you last logged on to My WatchList.

	Regulatory Section Title (Click to View)	Citation	Audit Applicability	Last Edit Date	Delete	Mark As Unread
1	Part 60 Table Of Contents - Standards Of Performance For New Stationary Sources	40CFR60	X-REF	1/18/2008	<input type="checkbox"/>	<input checked="" type="checkbox"/>
2	60.33e - Emission Guidelines	40CFR60.33e	X-REF	Before 1/1/2002	<input type="checkbox"/>	<input checked="" type="checkbox"/>
3	60.40 - Applicability And Designation Of Affected Facility	40CFR60.40	X-REF	6/13/2007	<input type="checkbox"/>	<input checked="" type="checkbox"/>
4	60.43 - Standard For Sulfur Dioxide	40CFR60.43	X-REF	6/13/2007	<input type="checkbox"/>	<input checked="" type="checkbox"/>
5	60.52c - Emission Limits	40CFR60.52c	X-REF	Before 1/1/2002	<input type="checkbox"/>	<input checked="" type="checkbox"/>
	60.53r - Operator Training And Qualification			Before	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Above: Regulations being monitored with My WatchList.

My WatchList integrates with Audit Applicability, allowing you to determine which audit questions need to be reviewed when regulations change. The X-REF feature pinpoints the questions related to each section.

Key Features:

- Web accessible -- provides fast access on your schedule!
- Shows which monitored regulations have changed since you last accessed the My Watch List service
- Changed regulations 'Last Edit Date' highlighted in Red
- Integrated with Audit Applicability. Easily determine which audit questions need reviewed when a regulation changes. User profiles can now be shared/exported between both utilities. (requires subscription to U.S. Team Guides™)
- My WatchList icon blinks when a monitored regulation has changed (shown on the RegScan Splash Page)
- Makes it easier to prove compliance per ISO 14001:2004
- Easy access to My Watch List - press home for the splash page or select from the treeview
- Click on a monitored entry to go directly to that entry
- Simple Point and Click method for additions to monitoring
- Five free entries with each Internet subscription, excludes the CFR Part Checker(TM)
- 'Add Section to My Watch List' only displayed when a section can be added
- Create multiple Profiles to help manage monitoring
- Each user can create their own My WatchList customized to monitor what they need. 'Clone', 'Export' and 'Merge' profiles to save time and stay consistent from facility to facility.
- CFR Part Checker(TM) feature of My Watch List allows monitoring of all sections within a part. Select a part on the CFR part level table of contents; click the add section button and My Watch List will monitor all underlying CFR sections for changes.
