

# Why do you *need* My WatchList?

My WatchList is a custom regulatory change management tool that allows you to monitor change at various detail levels. At the Federal level, it can monitor an entire CFR, a part, or just a specific section. Monitoring at the State level can be done for the entire state or just a specific section.

MyWatchList helps you monitor for change, but it also helps you manage the monitoring process. Its view history log allows you to show compliance with ISO 14001:4.3.2 requirements and those of RC14001. The view history log can also be used to show compliance with your internal auditing controls.

In many organizations a central group determines the regulations which must be watched. Using the multiple profiles feature in conjunction with Clone and Export allows for the creation and management of groups of regulations.

	Regulatory Section Title (Click to View)	Citation	Audit Applicability	Last Edit Date	Delete	Mark As Unread
1.	<a href="#">Part 60 Table Of Contents - Standards Of Performance For New Stationary Sources</a>	40CFR60	X-REF	1/18/2008	<input type="checkbox"/>	<input checked="" type="checkbox"/>
2.	<a href="#">60.33e - Emission Guidelines</a>	40CFR60.33e	X-REF	Before 1/1/2002	<input type="checkbox"/>	<input checked="" type="checkbox"/>
3.	<a href="#">60.40 - Applicability And Designation Of Affected Facility</a>	40CFR60.40	X-REF	6/13/2007	<input type="checkbox"/>	<input checked="" type="checkbox"/>
4.	<a href="#">60.43 - Standard For Sulfur Dioxide</a>	40CFR60.43	X-REF	6/13/2007	<input type="checkbox"/>	<input checked="" type="checkbox"/>
5.	<a href="#">60.52c - Emission Limits</a>	40CFR60.52c	X-REF	Before 1/1/2002	<input type="checkbox"/>	<input checked="" type="checkbox"/>
	<a href="#">60.53c - Operator Training And Qualification</a>			Before	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Above: Regulations being monitored with My WatchList.

For example, you can create a profile dedicated to OSHA safety regulations. Or you could create a profile for environmental, safety, and state regulations tailored to the Toledo plant, and then a similar (but different) profile for your Atlanta operation.

MyWatchList integrates with Audit Applicability, allowing you to determine which audit questions need to be reviewed when regulations change. The X-REF feature pinpoints the questions related to each section.

## Why do you *need* My WatchList?

- If you are having problems with plants or local operations identifying and monitoring regulations for change, you *need* My WatchList .
- If you need to monitor regulatory change to support audit activities you *need* MyWatchList.
- If you have problems knowing what audit questions might need to be reviewed when a regulation changes, then you *need* My Watchlist.
- If you have to comply with an auditor or standards you need My Watchlist to document and control your regulatory monitoring, you *need* My WatchList..
